SCAVANGER HUNT

INTRODUCTION

Dear Parents!

Welcome to our city tours! The concept of outdoor games and scavenger hunts is not a new one. We have adapted this approach to make the otherwise often numbers and history heavy city tours fun for both your children and you.

Our tours have been designed with kids in mind, so they won't come across too many dates and foreign words. Instead, they will discover many exciting stories and face tasks that will appeal to their sense of adventure. Rather than focusing on the sights themselves, the tour will emphasize the details and stories that surround them.

Your children can navigate the city with the help of the maps and directions by themselves, always depending of course on their age. The parent section of this book here will give you access to Google Maps to track the route on your smartphone and intervene if necessary.

It is not necessary to enter any buildings except for one station, you do not need to pay any admission fees to complete the tasks. Visiting each of the sights is optional.

The majority of the city center of Palma is pedestrianized, however, you should always keep an eye on your children so that they don't run in front of a car, bike, or carriage in the heat of the moment.

How it works:

The tour is self-guided using the information provided by us. You can plan your own schedule, take breaks or pause. We will guide you to special, recognizable, and sometimes unknown sights. All children will receive a map, which can be used through an app on the smartphone or printed out.

At each station, children can answer a question by searching for specific details at the locations they visit. The questions are easy to answer and supposed to train their eye to find things, they wouldn't notice if not pointed to.

THE MOBILE-APP

There are two ways to complete the scavenger hunt. The first is through the e-book for children, which you can either print out or run on a tablet. The second option is to use a mobile app. The app we use is very intuitive. Nevertheless, we want to provide a quick guide here, although your kids will probably figure it out quickly.

The app itself can be installed as many times as you like. However, our tour can only be started once with an individual QR code. If you use the QR code on one device, it is not possible to run the tour on another device afterwards.

The game is designed in a way that the individual stops can only be accessed one after the other. Questions with a gray background can only be answered once the previous question has been answered. It does not matter whether the answer is correct or wrong. In any case, the next stop is unlocked.

With the purchase of this tour, you will receive access to the scavenger hunt app. The registration takes place via a QR code, which we will send you in a separate e-mail 24 to 48 hours after purchase. If you do not receive the mail with the QR code within this time, please contact us at entdecker@mallorcafuerkinder.de.

Additional access / QR codes (for example, if siblings want to play against each other) can be purchased in our shop.

Please, think carein advance which device you want to use the scavenger hunt.
